

# Creating an ESHE Index Report

1 Visit: [eshe.engagementnetwork.org](http://eshe.engagementnetwork.org)

2 Hover over ESHE TOOLS and click ESHE REPORT.

The screenshot shows the '1. Location' and '2. Data Indicators' sections of the report creation interface. The 'County List' panel has a 'Select State' dropdown and a 'Filter list...' search bar. The 'Assessment Location' panel has a 'Report Location' section with a list of counties. A 'Data Indicators' button is visible at the bottom right.

County	State
Alabama	AL
Alaska	AK
Arizona	AZ
Arkansas	AR
California	CA

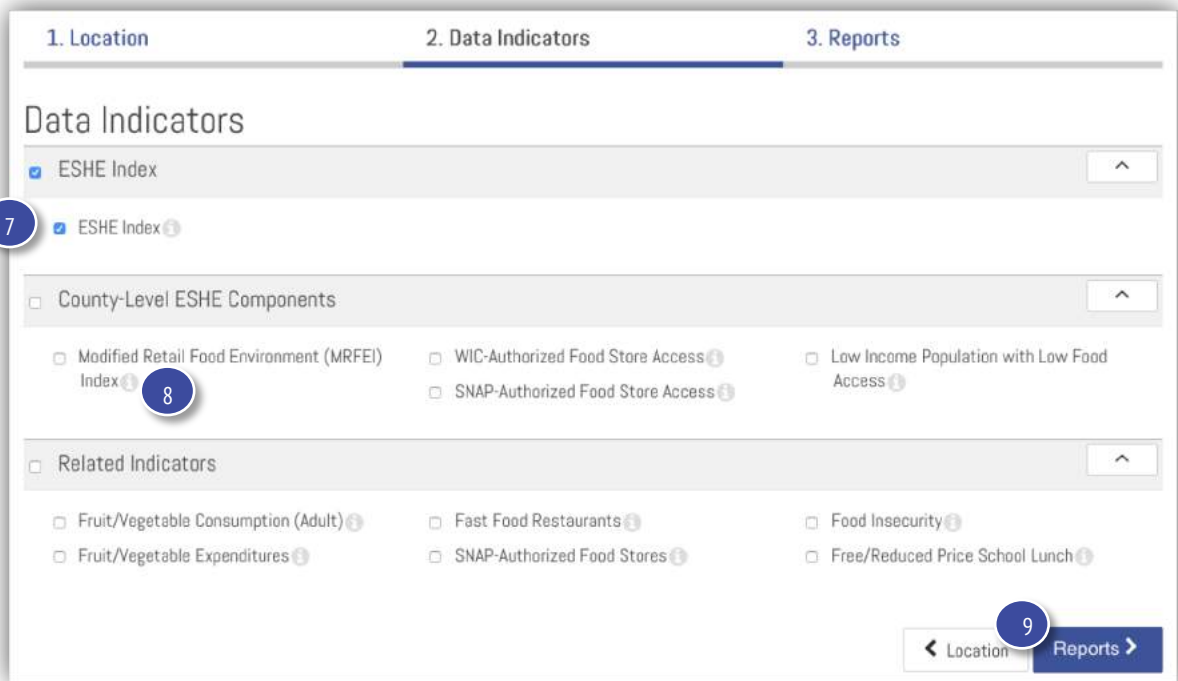

Report Location
<input checked="" type="checkbox"/> Bibb County, AL
<input checked="" type="checkbox"/> Blount County, AL

3 Begin by selecting your report area. First, click the name of a state.

4 Next, click the name(s) of one or more counties. Your selections will display in the ASSESSMENT LOCATION panel.

5 If you made an error in your selection, simply click the X next to the county name to remove it from the panel.

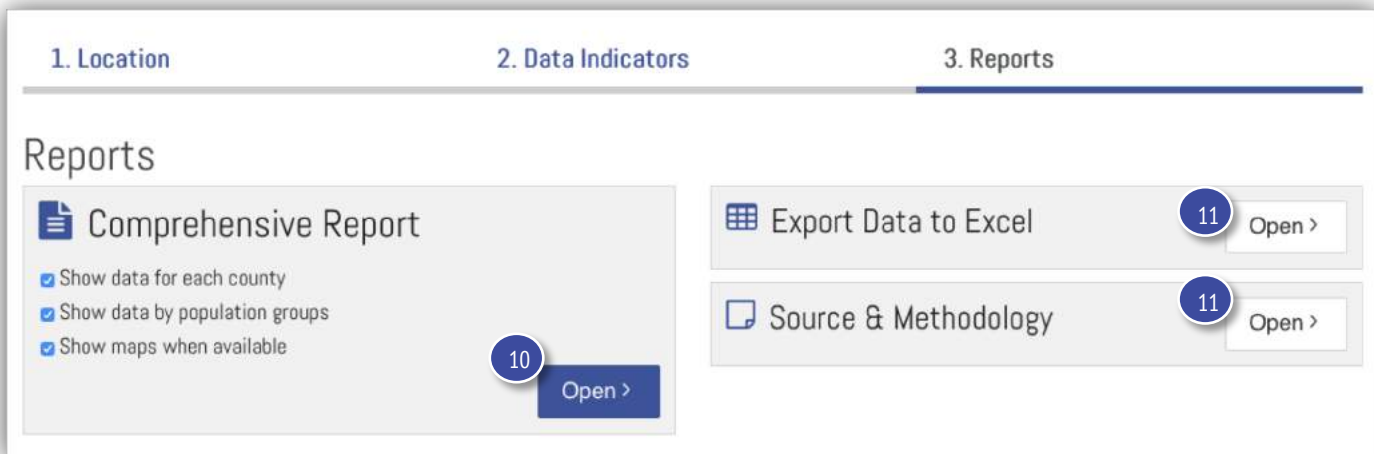

6 Finally, click the DATA INDICATORS button at the bottom to move on to the next step.

7 Next, click the check box next to each indicator you want to include in your report. You must select at least one indicator.

8 To learn more about an indicator, click the ⓘ button next to the indicator of interest. A pop up window will appear with source, methodology, and date information.

9 To move to the final step, click the REPORTS button at the bottom of the screen.

10 Finally, click the OPEN button to view your ESHE Index report.

11 To export the report data to Excel, click the OPEN button. To view source and methodology information, click the OPEN button.

# Environments Supporting Healthy Eating Report

## Location

Bibb County, AL

## ESHE Index

### ESHE Index

The ESHE Index is a way to rank communities or other geographic areas on factors related to healthy eating.

#### County Level ESHE Index – Within State Comparison

This indicator reports the ESHE index score and rank within the state. The index allows for comparison of a county with other counties in the state.

Note: ESHE index values are standardized on a scale from 0 to 1 where 1 signifies the most supportive food environment *within the state*. Indicator values are also standardized from 0 to 1. For example, an indicator score of .80 reflects the number of points (unweighted) that a county scores *relative to other counties in the state*. Scores for all indicators are weighted and then averaged to generate the final ESHE index score.

Report Area	Low Income and Adequate Food Access	Access to SNAP Stores	Access to WIC Stores	Access to Farmers Markets	Modified Retail Food Environment Score
Bibb County, AL	0.98	0.19	0.61	0.58	0.65
